

2023

Dax

In 2023, I'm tryna find a fuck to give
The empathy I lack has made it hard for me to live
Stuck in a society that profits off of clicks
And sexualizes everything for mediocre ego trips
I'm fucking finished with it, the cars, you can keep it
The content creation, the partyin' every weekend
The constant validation and feeling of being needed
By these people who don't love you, but love when you showing weakness
Yeah, I'm finished with it

God is on my side
Bible, I stay strapped, recitin' verses when I ride
Came up off my pain and now this lane where I reside's
Empty with no signs or demons fucking up my vibes
I'm disgusted by what I see in public
Even people closest to us can't be trusted
'Cause this algorithmic disease disease that social media breeds
Got us thinking outta pocket and I'm still getting adjusted
With that and also being famous, people knowing what my name is
Women actin' shameless 'cause they think my bank statements is outrageous
Tryna stain the steel, remain stainless
So I'm manifesting greatness when I'm rapping on these niggas saying

In 2023, I'm tryna find a fuck to give
The empathy I lack has made it hard for me to live
Stuck in a society that profits off of clicks
And sexualizes everything for mediocre ego trips
I'm fucking finished with it, the cars, you can keep it
The content creation, the partyin' every weekend
The constant validation and feeling of being needed
By these people who don't love you, but love when you showing weakness
Yeah, I'm finished with it

And they know it
I can't afford to lose my mind, I gotta keep my focus
2024's around the corner, and if you ain't addin' into my life
Bringing peace or shedding light, I'ma turn my head and act like I don't know you
I'm tired of looking over my shoulder
This paranoia been weighting me down
I got people depending on me, the family tree, I'm planting seeds
My roots are buried in my sounds, so you cannot come around me
All of these negative people
Anybody who's deceitful, good is winning over evil
Anybody got me overthinking and they causin' me a lot of stress
I'm praying for you from a distance, you'll get better and I'm wishing you the best

In 2023, I'm tryna find a fuck to give
The empathy I lack has made it hard for me to live
Stuck in a society that profits off of clicks
And sexualizes everything for mediocre ego trips
I'm fucking finished with it, the cars, you can keep it
The content creation, the partyin' every weekend
The constant validation and feeling of being needed
By these people who don't love you, but love when you showing weakness
Yeah, I'm finished with it

And they know it
Keep my focus
