

Wild Side

Daya

Here we are again
Tender to your touches
I'll wait for you to love me

Come over
Why you always run when you're sober
Does it ever leave you lonely?
I only ever see you on the outside

I can always meet you on the outside baby
We can blame it on your wild side, your wild side
Look on the upside baby
Can't keep lying with our tongues tied, we can't lie
Only know ya
When the darkness is pulling you closer
And you know what I like
To get me outside baby
We can blame it on your wild side, your wild side

I wanna take
I wanna take you out of here
I wanna know
I wanna know what you're really like
If it's right
If I like you

So come over
(Tell me what you like)
Why you always run when you're sober
(Wanna get to know ya)
Does it ever leave you lonely?
I only ever see you on the outside

I can always meet you on the outside baby
We can blame it on your wild side, your wild side
Look on the upside baby
Can't keep lying with our tongues tied, we can't lie
Only know ya
When the darkness is pulling you closer
And you know what I like
To get me outside baby
We can blame it on your wild side, your wild side

Outside baby
We can blame it on your wild side, your wild side
(Tell me what you like)
Can't keep lying with our tongues tied, we can't lie
(Wanna get to know ya)
Only know ya
When the darkness is pulling you closer
And you know what I like
To get me outside baby
We can blame it on your wild side, your wild side
