

Something

Dayglow

Taking me down, where is the place?
Calling a cab, showing up late
Now that it's all already waste
Who will you be?
Your coffee to go is hotter than Hades
Some people line up to see a Mercedes
Call it a car, then call it a lady
What'll it be?

Time won't take nothing, believe me
It's you that takes the time
Tell me if what makes you someone is something
Then why can't I have mine?
I've waited so long

Take it again, edit the face
Love what you see, copy and paste
Isn't it magic? Don't you want to have it
And say it's all mine? (That's mine!)
Compile the content, you're filming a mosh pit
You ship it and box it right to your doorstep
Ain't it a wonder that we're going under
But everyone's high?

Time won't take nothing, believe me
It's you that takes the time
Tell me if what makes you someone is something
Then why can't I have mine?
I've waited so long
