

Dark Sun

Dayseeker

You held your head up high 'til dying wasn't far away
I saw you reaching out for another way to be saved
I watched you cut through clouds when the color faded into grey
We knew that it was time to go, the atmosphere was burning slow

Oh I can feel the cold night, cold night
Eternally the sun light, sun light is fading away
When there is nothing left to run from
We watch it fade into a dark sun

I float in shallow seas as the sky is turning emery
The end of all is here and now
The atmosphere is where we drown

Oh I can feel the cold night, cold night
Eternally the sun light, sun light is fading away
When there is nothing left to run from
We watch it fade into a dark sun
We watch it fade into a dark sun

I want the world to know I'm buried in the memories
We knew that it was time to go, the atmosphere was burning slow

Oh I can feel the cold night, cold night
Eternally the sun light, sun light is fading away
When there is nothing left to run from
We watch it fade into a dark sun
