

Attitude

Dayshell

Is it safe to say your a walking riot
With your face pulled back
Oh the sound of your teeth when you grind them beneath
I won't be last

My face is cold and I'm stuck in the middle
While you're twirling your hair, doing your dance all of the time
This is a call to my arms but you run from me
You're scared of me

There's an evil version coming of us
We lie

I don't need your attitude
I've had it with you
I don't need your attitude
I've had it with you
Write me off send me off forget me

Go back to sleep I don't want this repeating
Cause it isn't right when we fight every night
You can tell it to him or tell it to no one for whom may I concern

There's an evil version coming of us
Like a curse in the form of fire
You're gonna lose yourself, lose yourself on me
We lie

I don't need your attitude
I've had it with you
I don't need your attitude
I've had it with you
Write me off send me off forget me

Come face the change
The way you were is falling off
Slowly
This will all be coming true
This will all be coming true

I don't need your attitude
I've had it with you
I don't need your attitude
I've had it with you
Write me off send me off forget me
Write me off send me off forget me
I don't need your attitude
I've had it with you
Write me off send me off forget me
