

I feel you hollow me out
I feel the empty dark swallow me down
But before I kneel down
I'll break the chains, fall in love
Flip off the new world baby

Flip off the new world baby
(But before I) flip off the new world baby
Flip off the new world baby
(But before I) flip off the new world baby

At this incredible rate
I feel my energy fade in immaculate pace
But before I kneel down
I'll break the chains, fall in love
Flip off the new world baby

Flip off the new world baby
(But before I) flip off the new world baby
Flip off the new world baby
(But before I) flip off the new world baby

Fuel my heart with love and gasoline

Now you are with me
The fuel from underground
Hold your wings up
We're taking over now

We're taking over now
Are you with me
The fuel from underground
Spread your wings up
We're taking over now

Flip off the new world baby
(But before I) flip off the new world baby
Flip off the new world baby
(But before I) flip off the new world baby
Flip off the new world baby
(But before I) flip off the new world baby
Flip off the new world baby
(But before I) flip off the new world baby

Fuel my heart with love and gasoline
