

The things you told me  
Hit my dome as hard as stone  
And when you touch me  
I begin to show my glow

For real I love you  
Surreal I know  
I feel no empty  
On this sail boat we will flow

I look around me what's with all the commotion now  
Think I found somebody that will hurt me the most  
Shooting from the hip I admit I'm a sucker for it  
Falling to my knees, baby please, I hate you for this

Here I show ya  
In the rain that sets the tone  
Supernova  
Up here I have to let you know

I need that real type of love  
So I can heal from it all

I look around me what's with all the commotion now  
Think I found somebody that will hurt me the most  
Shooting from the hip I admit I'm a sucker for it  
Falling to my knees, baby please, I hate you for this

Do you see my suffering hands  
Would you preach to me  
Only with good looks you'll get that far  
Only for the price you pay is crazy

I look around me what's with all the commotion now  
Think I found somebody that will hurt me the most  
Shooting from the hip I admit I'm a sucker for it  
Falling to my knees, baby please, I hate you for this

I look around me what's with all the commotion now  
Think I found somebody that will hurt me the most  
Shooting from the hip I admit I'm a sucker for it  
Falling to my knees, baby please, I hate you for this...
