

When we met it look quite clear to me
What you had was strong, was there for only me
Surely, you know you took me by surprise
When I turned and looked, I saw that message in your eyes

There you were up on the floor
The way you move, only made me want you more
I did not know you had me hypnotized
Caught the movement of your body dancing in my eyes

I know I had to hold you and make you mine
Don't wanna know you just to have a good time

On extacy, ah
When you're laying down next to me
On extacy, ah
Come and lay down next to me

I find it hard baby to concentrate
If I don't make my move now, it might be too late
I've got to make sure you don't go away
After all you've done, only make me wanna stay

All of my life, searchin' for a star
Now my search is over and here we are

On extacy, ah
When you're laying down next to me
On extacy, ah
Come and lay down next to me

I just wanna hold you and make you mine
Don't wanna control you just to have your time

On extacy, ah
When you're laying down next to me
On extacy, ah
Come and lay down next to me

Ah
Ah
Ah
Ah

Do you deal in it?
'Cause I want some
Baby, I can handle it
I gotta get some

I gotta get some
Ah
Ah
Ah
Ah
