

Save Me

Dead!

The rich will be rich, and the poor will be poised
To tear down the cause to show they have a voice
The cause of all these problems I'll put them on you
The lies you told, the lies they laid a blood on your heads
Things will never be the same

Save me (save me)
From these things that I have done
Save me (save me)
I can see where I went wrong

Remember our first day, wide eyed and young
You could change the face of everything
You could make it work if you didn't run
But what do we do in our times of need
You said you'll stay and you would never leave
Found a lover in the darkness of these streets
Now she is buried with the secrets that you keep

Save me (save me)
From these things that I have done
Save me (save me)
I can see where I went wrong
Save me (save me)
From these things that I have done
Save me (save me)
I can see where I went wrong

The houses are burning, the truth that you're learning
The world isn't after a saviour today
The world isn't after, the world isn't after
The world isn't after a saviour today

Save me
From these things that I have done
Save me
I can see where I went wrong

Save me (save me)
From these things that I have done
Save me (save me)
I can see where I went wrong
Save me (save me)
Save me (save me)
