

# Berserk

DeadLock

We found each other  
In the dark  
As we went berserk  
With blackened hearts

Maybe we ruined it  
Our lives among the dead  
Adapt and rearrange  
The inner fight for words to curse

This is my final prayer  
This is my final wish to bleed

Are we still alive?  
Let's slit and see  
Are we still alive?  
Let's slit and see  
So bear your agony  
You spoke of friendship  
But you meant worship

We found each other  
In the dark  
As we went berserk  
With blackened hearts  
(x2)

Maybe we fought in vain  
Our lives amongst the pain  
Adapted in agony  
The inner fight for words to solve

Maybe we fought in vain  
Maybe we fought in vain

We are still alive  
Why can't you see?  
Are we still alive?  
Let's slit and see  
So bear your agony  
You spoke of friendship?  
Liar!

Oh, we met in blood and dust  
From the beginning we were lost  
Now in the end, all is bust

We found each other  
In the dark  
As we went berserk  
With blackened hearts

With blackened hearts  
With blackened hearts
