

Carbonman

DeadLock

Once born within the same core
Death over life is what we adore
Acid clouds and iron skies
Out of the dead we will arise

We are all carbonmen
A universe in us
Forever in us

The Earth doesn't know who I am
Even though I am her carbonman
Finding back seems to be the only sense
Until my life slowly ends

The triumph of the dead realm
Centuries of human decay
Aamon calls
We obey

We are all carbonmen
(Carbonmen)
A universe in us
Oh, Lord (oh, Lord), forgive us

The Earth doesn't know who I am
Even though I am her carbonman
Finding back seems to be the only sense
Until my life slowly ends

We're all
We are all carbonmen
A universe in us
That's what we are
That's what we are

The Earth doesn't know who I am
Even though I am her carbonman
Finding back seems to be the only sense
Until my life slowly ends

The Earth does know who we are
A fellowship from the same star
Collapsed and exploded
Scattering our guts
A universe in us
That is what we are
What we are
That's precisely what we are
Just by being alive
