

# We Fade Forever

Deadstar Assembly

Walking into the shadows  
Amongst the cold and lonely  
Leaving a trail of regrets  
Is this the path we've taken in vain

Heading in the wrong direction  
The truth is we are only blood  
Defeating affection and the ones we love

As we fade away (We fade away)  
And realize time won't wait  
We fade away (We fade away)  
Reveal the hands of fate  
We fade away (We fade away)  
And realize time won't wait  
We fade away and now it's too late

And we fade away  
And we fade away  
And we fade away  
We fade forever

A legacy of wounds runs deep  
Rising up from hands and knees  
Ignite a strength of will  
And hold on to a destiny

As we fade away (We fade away)  
And realize time won't wait  
We fade away (We fade away)  
Reveal the hands of fate  
We fade away (We fade away)  
And realize time won't wait  
We fade away and now it's too late

Rise up from hands and knees  
Hold on to a destiny

As we fade away (We fade away)  
And realize time won't wait  
We fade away (We fade away)  
And now it's too late  
And now it's too late
