

Cold

Dean Lewis

I see the storm on the horizon
But you're the stillness on my mind
Something in me keeps on breaking
But you stitch me up every time

I feel you in my blood
You are the reason
The only thing that I can still believe in

Darling, I just wanna tell you all I know
Is with you, time moves slow
You're the only thing that keeps me from the cold
You're always warming me up with your "Please, don't go"s
You're my heart and soul
You're the only thing that keeps me from the cold
The only thing that keeps me from the cold
The only thing that keeps me from the cold

You see the smoke burn from the fires
That I lit all on my own
But when you place your head upon my shoulder
I finally feel I'm not alone

Darling, I just wanna tell you all I know
Is with you, time moves slow
You're the only thing that keeps me from the cold
You're always warming me up with your "Please, don't go"s
You're my heart and soul
You're the only thing that keeps me from the cold
The only thing that keeps me from the cold
The only thing that keeps me from the cold

Darling, I just wanna tell you all I know
Is with you time moves slow
You're the only thing that keeps me from the cold
