Excuses

Deas Vail

Bring yourself and no one else
You come alone or don't come at all
This is your chance to believe in
Something more than walls and ceilings
You're saving face to be on your way in

Come on, come on
Don't wait until the damage is done
It's gone when it's gone
Don't you want to know what we could become
On and on we run and we run from life
It's time we chase the smoke of our guns
And we make this right

Save yourself, now don't be scared
I'll do my part and be right there
I will probably come out running
With exploding buildings right behind me

Come on, come on
Don't wait until the damage is done
It's gone when it's gone
Don't you want to know what we could become
On and on we run and we run from life
It's time we chase the smoke of our guns
And we make this right

Come on, come on
Don't wait until the damage is done
It's gone when it's gone
Don't you want to know what we could become
Come on, come on
Don't wait until the damage is done
It's gone when it's gone
Don't you want to know what we could become
On and on we run and we run from life
It's time we chase the smoke of our guns
And we make this right
