

The Side Effect

Deas Vail

We'll forget this house
Because we have become like calloused hearts and we'll divide
Darkness always comes around
Treating us as strangers in convincing disguise
If you just shut your eyes

What is the side effect?
If we both forget
Like we were never lovers
I will wait years for you
If you want me to
And there will be no other

The words are forced and hollow
We're taking anything we can and wasting all our time
There isn't any time

What is the side effect?
If we both forget
Like we were never lovers
I will wait years for you
If you want me to
And there will be no other

Daylight only shines down
It lingers in the evening to chase shadows on the ground
They're getting longer now

What is the side effect?
If we both forget
Like we were never lovers
I will wait years for you
If you want me to
And there will be no other
