

## Under Our Skin

Deas Vail

Running faster than light I can't forget why I'm trying  
And asking questions that matter It's getting harder each time  
I can see I wanted to forget what went wrong  
We both know this is just under our skin, under our skin  
We can make it if we just pretended, never listened  
If we stand in the middle can we just take our time

Will you give me your best days, 'cause I'm giving you mine  
And I'll become the one to repair you, wait and see  
We both know this is just under our skin, under our skin  
We can make it if we just pretended, never listened  
We can make it matter, here is a terrible honest start

Working out all our problems, it doesn't make it disappear  
Complicates it, and what more there is a blame apart  
We both know this is just under our skin, under our skin  
We can make it if we just pretended, never listened  
We both know this is just under our skin, under our skin  
We can make it if we just pretended, never listened
