

I Don't Wanna Live Without You

Death Plus

I don't wanna live without you
Things turned out I really got to
I would probably take the knife and
Slit my wrists right there and die out
Take me out right where I told you
Put me where the rocks meet soil
I know this is hard and it isn't normal
Just do what I say it was nice to know you

There's something that I want you to know
That sometimes I don't think I'll grow old
I guess we'll just see how it unfolds
I'm on the edge or I'm coming close

I don't even like myself
Its always been this way
I think ima go to hell
But I don't even like this place
