

# Metal

## Deathstars

The wounds are bleeding from desperate cuts  
it's been flooding for days  
The heart is fighting to save the last breath  
Human oil on highways.

Metal, metal

The blade is thirsting for the juice of mankind  
it's been drinking for days.  
The chainsaws roar deep inside of god  
The blood fills the ashtrays.

I want to spit it out damn damn damn crush doom  
The shots are ringing out damn damn damn crush boom.

Metal, metal

The lambs are sleeping on a field of black flames  
A club held for the whores  
The taste of flesh is the pleasures of doom  
Benzine burns on our shores

I want to spit it out damn damn damn crush doom  
The shots are ringing out damn damn damn crush boom.

And when the west turn to east we'll feast.  
Then we'll find beauty in the pleasures of the beast.

Teach the slaves to bring me power  
I'm gonna teach about dark,  
I'm gonna teach about night  
The destroyed city will burn from the loins of this fight

Teach the slaves to bring me power  
I'm gonna teach about dark,  
I'm gonna teach about night  
A perfect slave will kiss the white lips of the night.

I'm gonna kiss the night

I want to spit it out damn damn damn crush doom  
The shots are ringing out damn damn damn crush boom.

Metal

I want to spit it out damn damn damn crush doom  
Metal  
The shots are ringing out damn damn damn crush boom.

And when the west turn to east we'll feast.  
Then we'll find beauty in the pleasures of the beast.
