

Sweet & Spice

Deb Never

Takin' the car, goin' to Mars
These nights are gettin' way too long, two in the morn
Talkin' to walls I'm gettin' lost, sit in the dark
I wonder how and where you are
Wonder how far you'd go to kill me there's

Poison in your kiss you love me to death, you'd do
Anythin' to get further in my head, I could
Fall in love again just to get a taste, honey
Stickin' out my neck got nothing to lose

I coulda tried, put in the time
From nine to five, you get me high out of my mind
My sweet and spice, say the word
I'll take the ride, I'm fallin' fast but if I die
It's worth the life, my sweet and spice

Kill the lights let's run away, doesn't matter where we go
Kill the lights let's fade away, close your eyes let it overtake

You fuck up my mood
I'm feelin' every shade of blue, don't lose your cool
You're goin' nuts a couple screws, coming loose
We left a mess up in my room, a static groove
What do I do?

Poison in your kiss you love me to death, you'd do
Anythin' to get further in my head, I could
Fall in love again just to get a taste, honey
Stickin' out my neck got nothing to lose

I coulda tried, put in the time
From nine to five. you get me high out of my mind
My sweet and spice, say the word
I'll take the ride, I'm fallin' fast but if I die
It's worth the life, my sweet and spice

I coulda tried, put in the time
From nine to five, you get me high out of my mind
My sweet and spice, say the word
I'll take the ride, I'm fallin' fast but if I die
It's worth the life, my sweet and spice

Kill the lights let's run away, doesn't matter where we go
Kill the lights let's fade away, close your eyes let it overtake
