

# When It's Over

Debby Boone

When it's over  
All over  
There's really nothing more that's left to say  
We both seem to know  
What started out so right today could end up  
As you go your separate ways

The laughter  
The good times  
All fade into a last and sad goodbye  
And you and I

Too soon  
To really know all that we've lost now  
Too late to even try  
Now and then you still pretend  
That love like this could never end

But it's over  
All over  
And it's like the morning sun has left the sky  
And all that's left  
Are long and lonely nights that seem forever  
There's nothing left to say but goodbye

When it's over  
All over  
And it's like the morning sun has left the sky  
And all that's left  
Are long and lonely nights that seem forever  
There's nothing left to say but goodbye
