

Hideaway

Declan J Donovan

Red eyes, warm embrace
The curtains drawn and morning faces
We gotta enjoy this
We gotta enjoy this

Sit back and breathe it in
Our Sunday best is skin to skin and
We gotta enjoy this
We gotta enjoy

Cause I got you
And you got me
And we got all the time we need
And more to stay in bed and pillow talk

The truth
The way we feel
Like we're the only people here at all
And nothing matters anymore

Let's spend another day
In our little hideaway
We'll make a home away from home and live there
One more night
We're staying wide awake
In our little hideaway
So we don't miss a single moment till the
Morning light

Stars out, it's getting late
The weekend's been a world away
You know we enjoyed it
Yeah I know we enjoyed it
This time tomorrow I'll
Be working, counting down the hours
I wanna avoid it
I wanna avoid it

Cause I got you
And you got me
And we got all the time we need
And more to stay in bed and pillow talk

Let's spend another day
In our little hideaway
We'll make a home away from home and live there
One more night
We're staying wide awake
In our little hideaway
So we don't miss a single moment till the
Morning light

Let's spend another day
In our little hideaway
We'll make a home away from home and live there
One more night

Let's spend another day
In our little hideaway
We'll make a home away from home and live there
One more night
We're staying wide awake
In our little hideaway
So we don't miss a single moment till the
Morning light

(We don't miss a single moment)
(Morning light)
