

Lost

Ded

(Lost)

Never thought I'd feel how I feel to say this
Take away the pain and you make it painless
Failure not an option we got this on lock shit down
And we trudge through the mud until we get the crowns now

Defiant as one
The moon and the sun
Together become
So invincible

Not a thing in the world could touch it right now
And you already know

I would be lost without you
Light of the fire in my eyes
Call on my name forever
Where the lines are a blur
It's us up against the world

Brought me back from the dead when I thought I checked out
Got a a new view of what is real respect now
Dreaming out loud and I'm proud of the things we are
Been a long road full of our heart and scars, it's hard

Defiant as one
The moon and the sun
Together become
So invincible

Not a thing in the world could touch it right now
And you already know

I would be lost without you
Light of the fire in my eyes
Call on my name forever
Where the lines are a blur
It's us up against the world

Nothing can stop us now
Nothing can bring us down
How do I
Express myself?
I can't do justice to
Say what I feel for you

I would be lost without you
Light of the fire in my eyes
Call on my name forever
Carry us through the great divide
I would be lost without you
Where the lines are a blur
It's us up against the world
It's us up against the world
It's us up against
It's us up against the world
