

# Desperado

Dee Snider

Now just look how much you gave  
The people that you tried to save  
They don't even wanna talk to you  
And when you see just what you are  
A desecrated fallen star  
A bad man with something to prove

Better stop, don't you realize  
It's yourself you compromise  
And it's gonna take more than a lot  
To give good as you got

Desperado, how will the wind blow  
You've got the fire, it's time to make a stand  
Desperado, where did your love go?  
Filled with desire, it's time to tip your hand

As you look back at the lies  
How your love was pushed aside  
You were beaten 'til you broke in two

Now as you climb out of your tomb  
Your broken heart is filled with gloom  
Do they know just what you're gonna do?

Better stop before you make a move  
Think what you stand to lose  
I know you're mad because you were burned  
But is there something that you've learned?

Desperado, how will the wind blow  
You've got the fire, time to make a stand  
Desperado, where did your love go?  
Filled with desire, it's time to tip your hand

Desperado  
Desperado  
Desperado  
Desperado
