

Roll over You

Dee Snider

It's not just a question for me
Now it's your time to walk away
I know that you are my enemy
There ain't a chance you'll last a day

You mean nothing to me
f*cking with me
Was your big mistake

You got no heart and we're not the same
You got so far but you never came
No heart, there's no one you can blame
You try to slow me down
But I roll over you

There are no friends that you'll find here
You shouldn't stay, you should go
With you there's just nothing to fear
There's something that you should know

You mean nothing to me
f*cking with me
Was your last mistake

You got no heart and we're not the same

You got so far but you never came
No heart, there's no one you can blame
You tried to slow me down
And I rolled over you

We f*cking despise you
You got no heart and it shows
We f*cking despise you
You're better off alone
We f*cking despise you
You best be on your way
We f*cking despise you
There's nothing more to say

Except I'm rolling on my own
I'm rolling my own

You got no heart and we're not the same
You got so far but you never came
No heart, there's no one you can blame
You never slowed me down
Cause I rolled over you
I rolled over you
f*ck you
