

# Love Is Everything

Deee-Lite

Love is everything  
Love love love...  
I woke in the middle of the night  
Just to see how you look when you're sleeping  
I don't need a conversation  
I just want to feel your vibration  
I know your dreaming  
And I hope it's about me  
Real...  
Sometimes you talk too much  
No words only melodies  
And there's nothing else to say  
Nothing else to say  
The words just get in the way  
I've got to find our melody  
Bring it back to me  
Bring it back to me  
Cause I know that you can feel it when it's real  
There's a smile on your face  
And it reminds me  
How much I like my place  
Right next to you  
Real...  
Follow your dreams  
No matter how far they seem  
Searching for the reason  
The mystery  
We can only dream  
We can only dream
