

Transplanting The Incureable

Defeated Sanity

Hunting for the unborn flesh lost the dignity of human life
Defenseless beings to open the skulls pan procreated not to be
born

To make use of the innocent tissue embryonic cells reinforcing
depravity

Transplanted into corroded brains to heal the incurable

Abused to extend worthless vegetating organic illness to be cur
ed

Forgotten mental sickness unborn generation no chance...

Victims of their ancestors utopic vision of the scum

The eyes of decades wisdom staring through the glass of broken
mirrors

Not visions to be seen results of mankind's failures

Mutilation from human being to diseased creatures

Cells taken from the innocent flesh to heal the irresistible

Disclosed as the beginning of the last wasting away

First seem to be cured maggots diverting with flesh

To conquer the real treat of the worthless body

Victims of their ancestors utopic vision of the scum

The eyes of decades wisdom staring through the glass of broken
mirrors

At the stake of their own fate

For them been slain by their own race

Lost consciousness redemption of corporeal decay

Like seen through the broken mirrors

The old man's eyes slowly getting closed

Characters of tragedy fading into nothingness

All life ends in genocide the end of a race...

Abused to extend worthless vegetating organic illness to be cur
ed

Forgotten mental sickness... to become free of human vices!
