

Endless Ray

Defeater

We born of a lightning fallen from the dark sky
We have a covenant, we fight keeping
Alive the wild spirit we will never retract.
The sky has fallen, I have taken refuge in the abysses
Forever hidden in the shadows,
I must fight for my glory.

Chorus:

Endless, through time we fight
Endless, with the power of the ray
Endless, through time we stay
Endless, with the power of the ray

Faster and heavy light, the thunder of our axe
We are going to conquer you
Now prepare your sword, it's time to fight
Our thunder cross your hearts
The eternal ray will prevail
Now, it's time to defeat, resist all you can
Now fight and attack!

There is no brains without life
We are suicidals of the death
We destroy falseness by the truth
Because the ray turned into metal
Made our way of reality
