

Still & True

Defeater

Been thinking about our better days
The nights we let slip away
The [?] lake when the longing's gone
Burn my lungs and forget your name
Replace it with a softer pain
The siren song ringing on and on and

Keep me like a note tune something borrowed and blue
Bury me sound asleep and keep me closer to you
Keep me like a note tune
I'm still and true

Been thinking about our better days
The nights we let slip away
The siren song ringing on and on and

Keep me like a note tune something borrowed and blue
Bury me sound asleep and keep me closer to you
Keep me like a note tune
I'm still and true

Woah, woah, woah, woah, woah, woah, woah

Keep me like a note tune something borrowed and blue
Bury me sound asleep and keep me closer to you
Keep me like a note tune
I'm still and true

Woah, I'm still and true
Woah, I'm still and true
Woah, I'm still and true
Woah, I'm still and true
