

# Waves Crash, Clouds Roll

Defeater

As the waves crash, the clouds roll (2x)

Sit on the dock waiting for the sun  
Wait for the coward but he never comes  
Pray for revenge on him  
Steam rises as the boats come in, one by one

You know she is gone  
You know there's no saving her  
You know she is gone  
You know  
Her cheating, her weak will, the addiction, that needle

When you come home to find her lying on the floor  
You're reminded of those sleepless nights that will haunt you f  
or the rest of your life  
Blue collar shipyard, any way to keep her alive  
Sun up to sun down, sun up to sun down  
Blistered hands and a parched mouth

You know she is gone  
You know there's no saving her  
You know she is gone  
You know  
Her cheating, her weak will, the addiction, that needle (2x)
