

# Hypothermia

## Defiance

Walking lost in the snow  
Can't decide which way to go  
Feel the chill take control  
As the avalanche starts to flow  
See your life before your eyes  
No one there to hear your cries  
Feel the ground start to shake  
As you lose all your fate

Try to scream  
Convince yourself it is just a dream  
Blood flows slow  
I tell you that there is no death more slow

Hypothermia in your brain  
As you panic you go insane  
Blood's pumping very slow  
'Cause you fight, the deeper you go  
Life you know starts to slip  
As you lose reality's grip  
Take a breath and make it last  
As your dreaming of your past

Try to scream  
Convince yourself it is just a dream  
Blood flows slow  
I tell you that there is no death more slow

Try to move, have no power  
It's getting colder by the hour  
Wishing you were in your bed

There's no feeling in your head  
Death you meet face to face  
Hypothermia takes it's place  
Better kiss your life goodbye  
Tears are freezing as you cry

Try to scream  
Convince yourself it is just a dream  
Blood flows slow  
I tell you that there is no death more slow

Froze to death  
For all to see  
Souls now trapped  
Never to be free

Walking lost in the snow  
Can't decide which way to go  
Feel the chill take control  
As the avalanche starts to flow  
See your life before your eyes  
No one there to hear your cries  
Feel the ground start to shake  
As you lose all your fate

Try to scream  
Convince yourself it is just a dream  
Blood flows slow  
I tell you that there is no death more slow  
  
Tell you that there is no death more slow...
