

Rx Queen

Deftones

I won't stop following you
now help me pray for
the death of everything new
then we'll fly farther
cause you're my girl
and that's alright
if you sting me
I won't mind
we'll stop to rest on the
moon and we'll make a fire
I'll steal a carcass for you
then feed off the virus
cause you're my girl
and that's alright
if you sting me
I won't mind
now look at em
look at em now
look at em sting
I see a red light in June
and I hear crying
you turn newborn baby blue
now we're all the virus
