

Light On

Dehd

No lie I couldn't stand the look on your face
Like it'll never be okay
You're right I didn't want to know
You said, you said you had something to say
That everything inside you had changed
Well if it's true how can I tell?

Every day, every night I will leave a light on
What you want, what you need, it won't be a problem
Where you at? Let me know I'll follow
Every day, every night I will leave a light on
What you want, what you need, I won't be a problem
When you knock knock knock, babe it ain't no bother

Is it different today?
Wish that I could find some strength

Alright, I didn't want to make a mistake
Okay, we're sitting here, we're trying to relate
What were you doing here alone?
Alright, my ego just got in the way
Turning every thought to jealousy
But was it worth losing a home?

Every day, every night I will leave a light on
What you want, what you need, it won't be a problem
Where you at? Let me know I'll follow
Every day, every night I will leave a light on
What you want, what you need, I won't be a problem
When you knock knock knock, babe it ain't no bother

There's a world outside
Still not sure what I hoped to find
