

Light It Up

Deitrick Haddon

I wish I could put everybody on a plane
And take a trip around the world
So they can see how we are all the same
And we all go through pain but love still remains
I think I have the solution
To wipe away all the confusion
Say the world need a lot of love
Say the world need a lot of love
Just little bit more love
Say the world need a lot of Love

If all of us (love)
We can change the world
If all of us (love)
The world needs
A lot of love
A lot of love
Lift your flags up
And light it up
Light it up with love

If all of us (love)
We can change the world
If all of us (love)
The world needs
A lot of love
A lot of love
Lift your flags up
And light it up
Light it up with love

We all share the same sun
Under the same moon
Like one big family under the same roof
You say you love God show me it's true
Showing love to your sister and brother right next you
Say the world need a lot of love
Say the world need a lot of love

If all of us (love)
We can change the world
If all of us (love)
The world needs
A lot of love
A lot of love
Lift your flags up
And light it up
Light it up with love

All of us should light it up
With a lot of love
Cause it's inside of all of us
If we just show the world that we are one and they are part of us
We could fill their hearts with love
Then we can spark that turns the darkness to the light in us
Cause Love is
Joy, Peace, Patience, kindness

Let's spread that like the virus
Tare down these walls that divide us
Cause we are made in the same likeness
Light it up all over the world
Love shines inside these boys and girls
To smile, laugh, dance, sing
Cause Love can conquer anything so
Light it up

Light it up

Light it up...

If all of us (love)
We can change the world
If all of us (love)
The world needs
A lot of love
A lot of love
Lift your flags up
And light it up
Light it up with love
