

## And The Music Plays On

Del Shannon

Sitting here as lonely as the sky without the sun  
Another busy signal as I call the one I love  
My arms they keep on reaching out, for things that should be there

She told me when I left she told me that she'd always care  
Two days I've been waiting, to talk with her again  
It must be a broken line or she's talking to a friend  
Cause I swear, I swear I heard her say  
If you need me baby I'll be there

And the music plays on and on and on  
The music plays on and on and on  
Our love was strong, was strong, it was strong  
When the music played on

Wonder if I'll ever, be with her again  
Seems I'm in the middle and just can't find the end  
Maybe I'll just light up another cigarette  
Poor me all the wine you got, maybe I'll forget  
All the plans we made and all the things we used to do  
All the lies she told me, me pretending to be true  
But I swear, I swear I heard her say  
If you need me baby I'll be there

And the music plays on and on and on  
The music plays on and on and on  
Our love was strong, was strong, it was strong  
When the music played on

And the music plays on and on and on  
The music plays on and on and on  
Our love was strong, was strong, it was strong  
The music plays on and on and on  
The music plays on and on and on  
The music plays on and on and on  
The music plays on and on and on  
The music plays on and on and on
