

# Man On The Moon

Delacey

What's it gonna take  
Cover me in lace  
Maybe if I scream you'll pay attention  
Make a cup of tea  
Anything you need  
You're so far from me, disconnected

Up and away in your universe  
And I'm just the girl that you keep on earth

They can put a man on the moon  
And I can't figure out a man like you  
Who're we kidding, you'll be leaving soon  
To take your rocket ship somewhere new  
And I would never think of changing you

Every time you land I try making you feel bad  
Claw marks on your back so you'll stay here  
Wish I could go there too  
See what's keeping you  
But I don't understand how to get there

Up and away in your universe  
And I'm just the girl that you keep on earth

They can put a man on the moon  
And I can't figure out a man like you  
Who're we kidding, you'll be leaving soon  
To take your rocket ship somewhere new  
And I would never think of changing you

Come back come back come back to me  
You light the sky like nobody  
Come back come back come back to me  
It's getting dark I need you please
