

Overlover

Delays

Lover its over so let it go
This club is dead and I'm off home
The taxis are bleeding they're way off track
I need some sign, that you'll come back now so...

Come on, come on and make it real
And feel the feelings that we feel,
I'm only waiting for a song to push you into my arms
And keep you there 'till morning comes

Well lover it's over the sky has drawn this day in close
That we're still gone with
We're watching the world as it's flags unfurl
But you still escape me so
