

The Sun Also Rises

Delphic

Living inside an ache, just growing pains
A fever pulses out the rain
Give me another day to mend my ways
It's not like no one never felt this before

Come alive
The sun also rises
Endless, endless, endless
All those sleepless, dreamless nights of mine
Nights of mine
Nights of mine

Falling down to the shore, it takes your score
To always pretend we're young again
I suddenly hide away, the great escape
Enough for this world then die before the road

Come alive
The sun also rises
Endless, endless, endless
All those sleepless, dreamless nights of mine
Come alive
Come alive, come alive, come alive
The sun also rises
The sun also rises
The sun also rises
The sun also rises

Give me another day to mend my ways
And always pretend we're young again
