

# Think About You

Delta Goodrem

I've got this habit, and I just can't stop  
Every time I look at you, your clothes are coming off  
And when we're talking, my mind is somewhere else  
Back at my apartment you and me and no one else

I'm having visions, it's like I can see right through  
I've got a feeling you know what I wanna do

I'm just gonna say it and I don't know how you'll take it  
I think about you naked when I'm looking at you  
My imagination got me losing concentration  
I think about you naked when I'm looking at you  
Always (do do do do do do)  
Bout bout you (do do do do do do)  
Think about you, bout bout you (do do do do do do)  
Bout bout you  
I think about you naked when I'm looking at you

My mind is crazy, playing tricks on me  
And everyone around us don't see what I see  
In a crowded bar, or a restaurant  
Everybody doesn't know that you've got nothing on

I'm having visions, it's like I can see right through  
I've got a feeling you know what I wanna do

I'm just gonna say it and I don't know how you'll take it  
I think about you naked when I'm looking at you  
My imagination got me losing concentration  
I think about you naked when I'm looking at you  
Always (do do do do do do)  
Bout bout you  
Think about you (do do do do do do)  
Bout bout you  
I think about you naked when I'm looking at you

Too many days I think about it  
Too many nights I've spent without it  
I need a way to get this started  
Get you out of my head and get you in my arms

I'm just gonna say it and I don't know how you'll take it  
I think about you naked when I'm looking at you  
My imagination got me losing concentration  
I think about you naked when I'm looking at you  
Always (do do do do do do)  
Thinkin' bout you (do do do do do do)  
When I'm looking at you  
Always  
Bout bout you (do do do do do do)  
I think about you naked when I'm looking at you
