

## Wish You Were Here

Delta Goodrem

I've been knock, knock, knocking at the thought of your door  
But you're not, not, not here anymore  
I ring, ring, ring - you're every thought in my head  
But I can't get through, the connection is dead

I want, want to tell you about the news today  
But you wouldn't believe me, you'd laugh it away  
There's a ghost standing at the foot of my bed  
And it's you, it's you, it's you, it was you

They told me who was in trouble  
I couldn't breathe on the other side of the world  
And there was nothing I could do to help you  
And it's true today it'd be your birthday  
It would've been your 27th year  
And I miss you in the earth's atmosphere  
I wish you were here

I go back, back, back, and every memory you're there  
But the clock ticks over every minute we shared  
On my knees begging for it not to be true  
But it was you, was you, was you, it was you

They told me who was in trouble  
I couldn't breathe on the other side of the world  
And there was nothing I could do to help you  
And it's true today it'd be your birthday  
It would've been your 27th year  
And I miss you in the earth's atmosphere  
I wish you were here

Instead of just in my dreams and in my imagination  
Confusing me completely from another dimension  
Can you see the beauty from a new beginning somewhere?  
'Cause I feel like I won't repair with time

It was you, was you, was you, it was you

They told me who was in trouble  
I couldn't breathe on the other side of the world  
And there was nothing I could do to help you  
And it's true today it'd be your birthday  
It would've been your 27th year  
And I miss you in the earth's atmosphere  
I wish you were here
