

Collide

Delta Heavy

I can feel you through the dark times
I can hear you deep in my mind
Can we find a space in time?
Two dimensions
Only you can read my mind and see inside

I need to find you
In the space where we collide
I need to find you
We are more than just two minds
We are more when we combine
We are more than just two minds
I need to find you
In that moment you and me collide

I need to find you
I need to find you

I need to find you
In the space where we collide
I need to find you
We are more than just two minds
I need to find you
In the space where we collide
I need to find you
In that moment you and me collide

I need to find you
I need to find you
