

# FEEL

Delta Heavy

Two hearts inside your eyes, can you feel the rush?  
Closing the gap we made, oh how I miss your touch  
Push through the ceiling now, we can raise it up  
Am I dreaming?

Come feel what I feel, come see what I see  
Drop your guard and let the night take over  
Come feel what I feel, come see what I see  
Drop your guard and let the night take over  
Drop your guard and let the night take over

I can't pick you up  
Come on, feel what I feel here and now  
Let me pick you up  
Come on, feel what I feel, I'll take you back right now

Come feel what I feel, come see what I see  
Come feel what I feel, come see what I see  
Come feel what I feel, come see what I see  
Come feel what I feel, come see what I see  
Come feel what I feel, come see what I see  
Come feel what I feel, come see what I see

I can't pick you up  
Come on, feel what I feel here and now  
Let me pick you up  
Come on, feel what I feel, I'll take you back right now

Come feel what I feel  
Drop your guard and let the night take over
