

## Forest Fire

Delta Sleep

I know you've been going through a little darkness  
And it feels like things won't ever be the same  
All the creatures in the forest out to get you  
Should be gone before the morning rain  
But I can't predict the changes in the weather  
That's a thing that even weathermen get wrong  
You don't have to bear the world upon your shoulders  
Only live there with an honest heart

I can be there when you're feeling kinda downward  
I can catch you if you think you're gonna fall  
Through the window where my day resides  
Is the ocean of eternal life  
And this picture will be burned into our memory  
Long before we even go our separate ways  
Kiss the corner of your broken smile  
Soon the spring will bring the forest fire
