

The Distance

Delta Sleep

Call tonight, I'll stay up even if it's late
I admit, I've been losing grip of this in many ways
Find a way beyond the distance aiming for the day
Where every night, I fall asleep with you

You've got the key to open up my weary heart
You wanna have it all please do
For our love it's justified
I just want you by my side always

The world is reaching non-existence, it's fading more each day
If time will end, I wanna end with you

It's hard not to feel estranged
With distance in the way
Tonight I will walk it with you

It's hard not to feel estranged
With distance in the way
Tonight I will walk it with you

It's hard not to feel estranged
With distance in the way
Tonight I will walk it with you
