

Toe Stepper

Delta Sleep

I've been here floating on the edge that I didn't notice
How all the darkness in my head has come to surface
It's not right, it's not right my friend
How could you leave me here? (to linger)
It's not kind. You're not kind my friend
After everything I give

I met myself the other day, and I tried escaping
My shadow coming out to play, I cannot shake it
It's not right, it's not right my friend
Are you too blind to see?
You're not kind, just be kind my friend
How easy it could be

I lost all sense of time
When shadows came to life

It's not right, it's not right my friend
How could you leave me here (to linger)
It's not kind. Just be kind my friend
After everything I give

I lost all sense of time, when shadows came to life
They pieced apart my life, and fed it to the night
