

Spotlight

Demi Lovato

You hold me close in your hands like a treasure
Like you'd walk the sky for my pot of gold
I can count on your strength, every measure
'Cause you stay in my heart like a metronome

And I know you, like you know me
Better then I know myself
Yeah, you know me, like I know you
Better then I know myself

When I get dark, when I get dark
You shine a spotlight on the good parts
When I get dark, when I get dark
You shine a spotlight on the good parts
When my heart is falling to pieces
You put it back like it never had a chance to break
When I get dark, when I get dark
You shine a spotlight on the good parts

On those days when I'm under the covers
When I feel all the cracks in the porcelain
You come on in, pull me out from under
And show me off to the world, but with thicker skin

And I know you, like you know me
Better then I know myself
Yeah, you know me, like I know you
Better then I know myself

When I get dark, when I get dark
You shine a spotlight on the good parts
When I get dark, when I get dark
You shine a spotlight on the good parts
When my heart is falling to pieces
You put it back like it never had a chance to break
When I get dark, when I get dark
You shine a spotlight on the good parts

You take every part of me
And make me feel like I can finally breathe, breathe, breathe
I'll do anything for you
To make you feel that I'm all that you need, need, need

When I get dark, when I get dark
You shine a spotlight on the good parts
When I get dark, when I get dark
You shine a spotlight on the good parts
When my heart is falling to pieces
You put it back like it never had a chance to break
When I get dark, when I get dark
You shine a spotlight on the good parts

Yeah, yeah
You shine a spotlight on the good parts
Yeah, yeah
You shine a spotlight on the good parts
