

# Stronger

Demi Lovato

The night is getting darker  
Soon the stars will be falling down to rescue us  
Sing a song for me  
Lift me higher with your words  
Sing that cold melody

So follow me onto the moonlit sidewalk  
And take my hand  
Grip it tighter and don't let it go

Passions taking over skies  
Leaving sand behind for them to choke on  
And they'll try to speak negatively about us  
But they can't say another word  
But they'll realize jealousy  
Has taken over their minds  
And the words they try to break me down with  
They only make us stronger

Did you feel that breeze?  
A tide of chills just swept over me  
It must have been from the brush of your hand  
Pull me into your arms a little closer baby  
I wanna see you standing next to me

So take a walk with me  
But keep the pace down  
I don't want this night to end  
Can't we run away together?

Passions taking over skies  
Leaving sand behind for them to choke on  
And they'll try to speak negatively about us  
But they can't say another word

Passions taking over skies  
Leaving sand behind for them to choke on  
And they'll try to speak negatively about us  
But they can't say another word  
But they'll realize jealousy  
Has taken over their minds  
And the words they try to break me down with  
They only make us stronger

Oh whoa

The night is getting darker  
Soon the stars will be falling down to rescue us
