

# Junk DNA

Demob Happy

All the stupid people  
Around the world  
They think it's wrapped up  
We're boys and girls  
We're nothing special  
Just a bag full of bones  
A happy mistake that we were born

But I was told that I was different  
Part alien  
Ten different species can make a man

We're not enough  
We're not enough  
But if we're good  
Then they're alright to us

I'm strung out  
I'm strung out  
I'm strung out  
I'm strung out

Check out this giza  
His eyes could light up a room  
He took a wobbler 'cus of mr. moon  
Oh man I know she took me easy  
Sucked on my junk DNA  
But I left something on board that plane

Mother creator  
Gene manipulator  
Will I be happy if I see you later?

I'm strung out  
I'm strung out  
I'm strung out  
I'm strung out

No matter what time it is  
I could always use a little bliss

No matter what time it is  
I could always use a little bliss

No matter what time it is  
I could always use a little bliss

No matter what time it is  
I could always use a little bliss

Turn another  
Turn another screw  
It's a killer, killer knowing you

But I was told that I was different  
Part alien  
Ten different species can make a man

We're not enough  
We're not enough  
But if we're good  
Then they're alright to us

I'm strung out
