## The Valley Of Life

## **DemonLord**

Long time ago, as my father died And I was just a child I wasn't believed in fairy tales I put them on one side

My father was a dreamer
But one day in my life
I took all his words for granted
As he told me about the valley of life

Across the great desert Miles from here Where the sun goes down Beyond the hill

Valley of life - I have to search it Valley of life - Somewhere far beyond Whit my crowning effort, and with all of my power I will find the valley of life

On his death-bed my father said me You don't have more time You have to be strong and young enough To get eternal life

Thousand soldiers by my side Across the great desert we ride Thousand days and thousand nights We're about the valley to find
