

Wolves in Winter

Demons & Wizards

Wild is the call
For the unspoiled soul
Look deep in my eyes
There is something so strong
I am you!

You think you can defy me
Resisting all along
But I am always with you
I catch you when you fall
So take a look
How far you've come
It's my intention
You grow

Just know no fear and trust me
Dead winter comes
For the darkness is thick
You won't be alone
The full moon
It howls
I am you!
There is something unknown
I don't fear it anymore!

Wrap your arms around me and know
Like grey wolves in winter
Our pact is ever strong
Now your instincts have found me
The chase is on

Just know
You're not alone
Forever you're free
I may dwell in silence
Oh, I may come to feed

Let me out now
The trial of your soul
The pain lingers on
As you bleed
For the chase

Feel the power rise within you
The full moon's glow
And you transform
The beast within you
Rise to rule
And you transform

So find the prey and lead me
I'll know
The hunt is all seasons
The raven and the wolf
Spread your dark wings around me
The chase is on

Just know
You're not alone, forever you're free
I may dwell in silence
Oh, I may come to feed
Let me out now
The trial of your soul
The pain lingers on
As you bleed
For the chase

Feel the power rise within you
The full moon's glow
And you transform
The beast within you
Rise to rule
And you transform
