## **Do Something**

All I am now, fall for a way down More than a handshake or a grin More than a test for old friends I'll wait til Monday for a step outside You can pretend all you want to I don't mind More than a handshake or a grin More than a test for old friends One more chance to, chance to do something Pushed you down and out Farther than I should Wanted just enough A rescue never could It's only in the dark Eyes can be open or shut One more chance to, chance to do something All I am now, fall for a way down
